Beauvais Cathedral
Stephen Murray 1989
Intended by medieval

builders to be the
greatest of the High
Gothic cathedrals,
Saint-Pierre Beauvais
has achieved notoriety
among historians because
it was indeed the

tallest structure of its kind and because it collapsed. This book relates the extraordinary story of the cathedral which, despite the collapses of its 150-foot high choir in 1284 and its crossing tower in 1573, has managed to withstand a series of natural and political catastrophes that have ravaged the surrounding town throughout the past seven hundred years. By analyzing both archaeological evidence and historical documents, Stephen Murray examines separately the various phases of construction from the eleventh to the sixteenth century to determine the essential architectural quality of each phase and its relationship with the historical context. The author discusses, for example, how the use of a five-aisled pyramidal

basilica reveals the pretensions of the founding bishop, Miles of Nanteuil, whose exclusive allegiance to the Church aroused bitter opposition from the French king Louis IX and segments of the bourgeoisie. In employing a new understanding of the process of design and construction, Murray shows that the Beauvais cathedral was the product not of one single sublime vision but of the conflict arising from several distinct artistic perspectives that may have led to the creation of a basically flawed overall structure.

New Approaches to
Medieval Architecture

Robert Odell Bork 2011
The contributors to this
book are among those at
the forefront of the
emergence of new
critical perspectives
and new technologies.
Several of the essays
present dramatic
reinterpretations of
canonical monuments;
consider broader
methodological issues
such as the applications
of geometry, workshop
practice, and the
shaping of historical
narratives; and others
demonstrate how high-
tech scanning and
visualization methods
can enhance our
understanding of
construction methods and
the behavior of
buildings.

Murray & Nadel's
Textbook of Respiratory
Medicine E-Book

V.Courtney Broaddus
2021-05-28 Known for its
clear readability,
thorough coverage, and
expert authorship,
Murray & Nadel's
Textbook of Respiratory
Medicine has long been
the gold standard text
in the fast-changing
field of pulmonary
medicine. The new 7th
Edition brings you fully
up to date with newly
expanded content,
numerous new chapters, a
new editorial team, and
extensive updates
throughout. It covers
the entire spectrum of
pulmonology in one

*Downloaded from

authoritative point-of-care reference, making it an ideal resource for pulmonary physicians, fellows, and other pulmonary practitioners. Offers definitive, full-color coverage of basic science, diagnosis, evaluation, and treatment of the full range of respiratory diseases. Provides detailed explanations of each disease entity and differential diagnoses with state-of-the-art, evidence-based content by global leaders in the field. Contains a newly expanded section on common presentations of respiratory disease, plus new chapters on COVID-19, asthma and obesity, airplane travel, lung cancer screening, noninvasive support of oxygenation, lung microbiome, thoracic surgery, inhaled substances, treatment of lung cancer, and more. Covers

hot topics such as vaping; advanced ultrasound applications and procedures; interventional pulmonology; immunotherapy; lung cancer targeted therapy; outbreaks, pandemics and bioterrorism; point-of-care ultrasound; use of high-flow oxygen, and more. Includes extensively reorganized sections on basic science, pleural disease, and sleep, with new chapters and approaches to the topics. Features more than 1,450 anatomic, algorithmic, and radiologic images (400 are new!) including CT, PET, MR, and HRCT, plus extensive online-only content: 200 procedural and conceptual videos plus audio clips of lung sounds. Brings you up to date with the latest respiratory drugs, mechanisms of action, indications,

precautions, adverse effects, and recommendations, with increased emphasis on algorithms to illustrate decision making.

Time Honored John H. Stubbs 2009 "The absence heretofore of a comparably thoroughgoing but accessible resource on a topic of such urgent public concern was a glaring lapse that makes this deeply researched, lucidly written, and helpfully annotated book an invaluable addition to the literature."— New York Review of Books
Time Honored is a comprehensive survey of the practice, theory, and structure of architectural heritage conservation throughout the world. Offering an argument for why architectural conservation is indispensable to modern life, **Time Honored** describes its parameters

and evolution in an historical context, and then methodically presents approaches used in various countries, showing how historic preservation in the West differs from conservation in the rest of the world. Illustrated throughout with over 300 photographs, drawings, maps, and charts. No other book navigates the global conservation programs, policies, and project types so completely.

The Future of the UK's Strategic Nuclear Deterrent Great Britain. Parliament House of Commons. Defence Committee 2006-12-19 In its White Paper (published in December 2006 as Cm 6994, ISBN 0101699425) on the future of the UK's nuclear deterrent, the Government reaffirmed its commitment to maintain the submarine-

based Trident weapons system. This will require the procurement of a new generation of nuclear-powered Trident submarines to replace the current fleet of Vanguard-class submarines. Following on from the Committee's earlier report on the strategic context and timetable for decision-making on the renewal of the UK's nuclear deterrent (HCP 986, session 2005-06; ISBN 0215029445), this report focuses on issues related to the UK manufacturing and skills base. These include: the level of investment needed to sustain essential infrastructure and core skills in the UK submarine construction industry; the potential consequences of a gap in the submarine building programme for the long-term viability of the domestic manufacturing

and skills base; the implications of the rationalisation of the UK shipbuilding industry for the construction, maintenance and affordability of a Vanguard-class successor; and the linkage between the Government's Defence Industrial Strategy and the decision on retention, replacement or abolition of the UK's Trident system. It also examines the Government's investment programme at the Atomic Weapons Establishment and the possible impact of a new civil nuclear build programme for the retention of nuclear skills and expertise in the military sector.

Fifty Key

Anthropologists Robert J. Gordon 2010-11-15
Fifty Key

Anthropologists surveys the life and work of some of the most influential figures in anthropology. The entries, written by an international range of expert contributors, represent the diversity of thought within the subject, incorporating both classic theorists and more recent anthropological thinkers. Names discussed include: Clifford Geertz Bronislaw Malinowski

Zora Neale Hurston

Sherry B. Ortner Claude

Lévi-Strauss Rodney

Needham Mary Douglas

Marcel Mauss This

accessible A-Z guide

contains helpful cross-

referencing, a timeline

of key dates and schools

of thought, and

suggestions for further

reading. It will be of

interest to students of

anthropology and related

subjects wanting a

succinct overview of the

ideas and impact of key

anthropologists who have

helped to shape the

discipline.

2013-12-01 A scientific response to the best-selling The Bell Curve which set off a hailstorm of controversy upon its publication in 1994. Much of the public reaction to the book was polemic and failed to analyse the details of the science and validity

of the statistical arguments underlying the books conclusion. Here, at last, social scientists and statisticians reply to The Bell Curve and its conclusions about IQ, genetics and social outcomes.
