Combining military utility with classic and distinctive design, the Defender had been a ubiquitous presence on the automobile scene since its release more than half a century ago. But 68 years since the first model came on the market, the production line came to a halt in January 2016. This presents the perfect opportunity to look back over the Land Rover's history, from its first iteration as a utility vehicle in 1948, to the 21st Century special editions. Landy fans and petrol-heads alike will love Land Rover Defender, a highly illustrated collection of classic and limited edition models, filled with specs, stats, and images of Defenders both at home and abroad. From its reputation as the essential go-anywhere vehicle, the Defender has even won some famous fans, and owners can include the Queen, Sir Winston Churchill and actor Steve McQueen amongst their numbers. In recent years, the Defender has gained a second life as a city vehicle, and proves itself to be just as at home bombing around the streets of London as it always has been in the West Country mud or on the African savannah. The last model came off the production line in February 2016, and Land Rover Defender will be a treasure trove for car lovers and Landy owners alike.

The Car Hacker's Handbook Craig Smith 2016-03-01 Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Support to High Intensity Operations Great Britain. National Audit Office 2009 The provision of support for troops in Iraq and Afghanistan is made more difficult because they operate in remote locations and harsh conditions. Despite the challenging operational environments, the Ministry of Defence (MOD) has successfully delivered around 300,000 personnel and 90,000 tonnes of freight to Iraq and Afghanistan over the last two years. However, it has not consistently met its targets for delivering supplies in a timely fashion. The MOD is taking measures to improve the effectiveness of its supply chain; and the amount of time a unit waits for items to

be delivered has reduced by half in Afghanistan and a third in Iraq. ♦4.2 billion has been approved to upgrade or buy new equipment to meet urgent requirements in the two theatres. The NAO found that the availability of this equipment has generally met or exceeded targets, though there have been spares shortages with some fleets particularly when the vehicle is used for a different purpose than intended. The availability and serviceability of helicopters has exceeded MOD targets, although prioritisation of spare parts for operations has led to reduced availability in the UK. There are also shortages of equipment for Service personnel in the UK to train with, prior to deployment overseas. Accommodation, medical and welfare services to Service personnel on operations are generally satisfactory although provision at

the smaller patrol bases is more basic. The helicopter borne Medical Emergency Response Teams provide quick, life-saving medical support to casualties and evacuate them speedily to hospital.
