Why the Haves Come Out Ahead Marc Galanter 2014-09-15 This is the fortieth anniversary edition of a classic of law and society, updated with extensive new commentary. Drawing a distinction between experienced “repeat players” and inexperienced “one shotters” in the U.S. judicial system, Marc Galanter establishes a recognized and applied model of how the structure of the legal system and an actor’s frequency of interaction with it can predict outcomes. Notwithstanding democratic institutions of governance and the “majestic equality” of the courts, the enactment and implementation of genuinely redistributive measures is a hard uphill struggle. In one of the most-cited essays in the legal literature, Galanter incisively demolishes the myth that courts are the prime equalizing force in American society. He provides a penetrating analysis of the limitations and possibilities of courts as the source and engine of large-scale social change. Galanter’s influential article is now available in a convenient, affordable, and assignable book (in print and ebooks), with a new introduction by the author that explains the origins and aftermath of the original work. In addition, it features his 2006 article applying the original thesis

to real-world dilemmas in legal structure and consequence today. The collection also adds a new Foreword by Shauhin Talesh of the University of California-Irvine and a new Afterword by Robert Gordon of Stanford. As Gordon points out, “The great contribution of the article was that it went well beyond local and contingent political explanations to locate obstacles to social reform and redistributive policies in the institutional structure of the legal system itself.” Gordon details ways in which Galanter’s prophecies have come true and even worsened over four decades. Talesh catalogs the article’s place in legal lore: “seminal, blockbuster, canonical, game-changing, extraordinary, pivotal, and noteworthy.” Talesh introduces how repeat players gain advantages in the legal system and how “Galanter set out an important agenda for legal scholars, sociologists, political scientists, and economists. In short, “every law and legal studies student should be required to read the article because it contextualizes the procedural system as something more than a set of rules that should be memorized and mechanically applied.” A powerful new addition to the Classics of Law & Society Series by Quid Pro Books. Features active contents, linked notes, active URLs, and linked Index.

Integrated General Education

Catherine M. Wehlburg 2010-04-19  
General education has been an essential part of American higher education for a long time. Unfortunately, it is often seen as something to "get out of the way" so that the student can go on to take the more "important" courses within a chosen major. This volume changes that perception. Topics discussed include: Integrated General Education: A Brief Look Back Why are Outcomes So Difficult to Achieve? Making General Education Matter: Structures and Strategies Unifying the Undergraduate Curriculum Through Inquiry-Guided Learning University of the Pacific's Bookend Seminars on a Good Society Core Curriculum Revision at TCU: How Faculty Created and Are Maintaining the TCU Core Curriculum Creating an Integrative General Education: The Bates Experience Building an Integrated Student Learning Outcomes Assessment for General Education: Three Case Studies Meaningful General Education Assessment That is Integrated and Transformative Institutions of higher education have a responsibility to develop a meaningful general education curriculum that cultivates qualities of thinking, communication, and problem solving (to name a few of the general education goals that many institutions share). What is missing from many institutions, though, is the concept of integrating general education with the overall educational curriculum. If this is done, general education courses are no longer something to take quickly so they can be checked off; instead; they become part of the educational development of the student. This integration benefits the student, certainly, but also the larger society--baccalaureate graduates steeped in the liberal arts will become future leaders. Having been prepared with a broad knowledge base,

our current students will be able to think more critically and make good use of information to solve problems that have not yet even been identified. This is the 121st volume of the Jossey-Bass higher education quarterly report series New Directions for Teaching and Learning, which offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

*Musical Form, Forms & Formenlehre* William E. Caplin 2010 The tone of the debates among Caplin, Hepokoski, and Webster (in the form of comments on each author's essay and then responses to the comments), though tactful, is obliquely blunt and tendentious; like the best of tennis pros, each author strives to serve an ace and defends the net against a passing shot (with Caplin, the ace is for formal function; with Hepokoski for Sonata Theory and dialogic form; with Webster for multivalent analysis). But we can trust that this provocative exchange will thoroughly invigorate discussions about classical form and encourage diverse approaches to its analysis.

Teaching Academic Writing Caroline Coffin 2005-07-26 Student academic writing is at the heart of teaching and learning in higher education. Students are assessed largely by what they write, and need to learn both general academic conventions as well as disciplinary writing requirements in order to be successful in higher education. Teaching Academic Writing is a 'toolkit' designed to help higher education lecturers and tutors teach writing to their students. Containing a range of diverse teaching strategies, the book offers both practical activities to help students develop their writing abilities and guidelines to help lecturers and tutors think in more depth about the assessment tasks they set and the feedback they give to students. The authors explore a wide variety of text types, from essays and reflective diaries to research projects and laboratory reports. The book draws on recent research in the fields of academic literacy, second language learning, and linguistics. It is grounded in recent developments such as the increasing diversity of the student body, the use of the Internet, electronic tuition, and issues related to distance learning in an era of increasing globalisation. Written by experienced teachers of writing, language, and linguistics, Teaching Academic

Writing will be of interest to anyone involved in teaching academic writing in higher education.
