Why Fish Don't Exist Lulu Miller 2020-04-14 A wondrous debut from an extraordinary new voice in nonfiction, *Why Fish Don't Exist* is a dark and astonishing tale of love, chaos, scientific obsession, and—possibly—even murder. David Starr Jordan was a taxonomist, a man possessed with bringing order to the natural world. In time, he would be credited with discovering nearly a fifth of the fish known to humans in his day. But the more of the hidden blueprint of life he uncovered, the harder the universe seemed to try to thwart him. His specimen collections were demolished by lightning, by fire, and eventually by the 1906 San Francisco earthquake—which sent more than a thousand of his discoveries, housed in fragile glass jars, plummeting to the floor. In an instant, his life's work was shattered. Many might have given up, given in to despair. But Jordan? He surveyed the wreckage at his feet, found the first fish he recognized, and confidently began to rebuild his collection. And this time, he introduced one clever innovation that he believed would at last protect his work against the chaos of the world. When NPR reporter Lulu Miller first heard this anecdote in passing, she took Jordan for a fool—a cautionary tale in hubris, or denial. But as her own life slowly unraveled, she began to wonder about him. Perhaps instead he was a model for how to go on when all seemed lost. What she would unearth about his life would

transform her understanding of history, morality, and the world beneath her feet. Part biography, part memoir, part scientific adventure, *Why Fish Don't Exist* reads like a fable about how to persevere in a world where chaos will always prevail.

Presidential Hopefuls (1788-2008): Who Won, Who Lost, And Why is an extraordinary book that answers any questions the reader might have with respect not only to the 43 Presidents of the United States but to those hopefuls who lost in their attempts to win a presidential election. Dr. Sher has written a chapter on each President, two for Grover Cleveland since he won two elections that were not consecutive. Each chapter includes sections dealing with all of American history's presidential elections and their results, the winner's political background that placed him a position to be a candidate in the first place, introduction and political experience of those who ran against the victorious President, and each President's legacy which reveals both the good and the bad that he experienced while in office. Chapter 44 is entitled "On The Road To 2008," and is the author's perspective on the 2008 presidential election, with introductions of all the hopefuls and their platforms as they strive to win their party's nomination for the election scheduled for November 2008. The "Conclusion" chapter, in addition to testing the hypotheses that

Sher set forth in his "Introduction" introduces the reader to five respectable presidential ranking systems, and to Sher's own ranking of the greatest and weakest Presidents in American history based on his criteria for presidential greatness. The book ends with three interesting Appendices: one dealing with presidential trivia; another with nasty remarks made by former Presidents against an incumbent President; and the third, shortcomings, failures, or criticisms leveled on even those Presidents who head the list of our greatest.

Among their secrets: How Jack Kennedy tried to blame Ike for the Bay of Pigs. How Ike quietly helped Reagan win his first race in 1966. How Richard Nixon conspired with Lyndon Johnson to get elected and then betrayed him. How Jerry Ford and Jimmy Carter turned a deep enmity into an alliance. The unspoken pact between a father and son named Bush. And the roots of the rivalry between Clinton and Barack Obama. Time magazine editors and presidential historians Nancy Gibbs and Michael Duffy offer a new and revealing lens on the American presidency, exploring the club as a hidden instrument of power that has changed the course of history.
